

PERSONAL PROFILE

Dedicated BSc. CSIT student at National College of Computer Studies (NCCS) with skills in web development and database management. I have experience working with a variety of technologies and enjoy solving complex problems. I am always eager to explore new tools and innovative solutions, creating projects that make a positive impact. With a strong commitment to learning and adaptability, I strive to grow both personally and professionally while delivering valuable results through technology and creative approaches.

PROJECTS

ApplyRush – A Smart Job Portal

GitHub

- Developed a full stack job portal using ReactJS, NodeJS, ExpressJS and MongoDB(MERN stack)
- Integrated features like job recommendation system with admin side dashboard

SmartPass Nepal – Modernizing passport services for the digital era.

GitHub

- Developed an online passport application system for Nepal Government using the MERN stack (MongoDB, Express.js, ReactJS, Node.js)
- Integrated features such as esewa payment gateway, online application submission, admin management for reviewing and processing application, automatic email notification.

City VS Nature Classification

GitHub

- Developed a simple City VS Nature classification using Convolution Neural Networks (CNN) to distinguish between urban and natural environments based on input images.

RimalGPT

RimalGpt, GitHub

- Created an intelligent conversational assistant using Gemini API, designed to answer questions, provide suggestions, and engage users through a chat interface

BookWave – Simplifying book shopping online

GitHub

- Developed an online book store using HTML, CSS, JS, PHP and MYSQL, allowing users to browse, purchase books, and make payment via esewa with order confirmation email.

EDUCATION

2022 – Present Bachelor of Science in Computer Science and Information Technology (BSc. CSIT)
National College of Computer Studies (NCCS) affiliated to Tribhuvan University

2019 – 2021 High School at National Institute of Science and Technology (NIST) College 3.67 / 3.46 CGPA

SKILLS

Programming Languages:

- PHP: Designed and implemented secure backend logic to enable seamless integration with web applications.
- Python: Created data visualization tools with interactive dashboards to support better decision-making processes.
- JavaScript: Developed dynamic user interfaces and facilitated front-end and back-end communication using REST APIs
- C/C++: Utilized foundational programming principles in college projects, emphasizing performance and efficiency.
- JAVA: Applied programming concepts on college projects, focusing on object-oriented design.

Databases:

- MySQL: Learned about Relational Database Model using MySQL and implemented in different projects
- NoSQL: Gained hands-on experience with medium scale data handling, efficient data splitting, data retrieval, and document based storage through college projects.

Tools:

- Git & GitHub: Used as code storage and tracking changes in the code
- Postman: Used extensively for API testing and debugging during development cycles.
- Figma: Used to create designs and prototypes for different college projects

Additional Familiarity:

TailwindCSS, MongoDB, Quality Assurance, Apache, NumPy, TensorFlow, Scikit-learn, Image Processing, UI/UX designing, XML, Artificial Intelligence, Operating Systems

Non-Technical Skills

Problem-Solving, Critical thinking, Teamwork, Time management, Adaptability, Creativity, Troubleshooting, Technical Documentation, Continuous Learning
